LUMILINE Y SURFACE MOUNTED PROFILE

Lumiline Y aluminium profile for surface-mounting. Perfect for household and office room illumination - lighting of columns, countertops. This is an innovative product on the lighting market. One of the most minimalist and modern designs. The extremely interesting and modern design of the Y LUMILINE SLIM profile allows us to meet the needs of our customers in the use of LED strips for the creation of light lines.

Thanks to the increased dimensions of the profile's side walls, we can obtain a uniform and more targeted light without visible LEDs (with the use of the milky cover). The profile retains the impression of a discreet fixture for LED strips and is perfectly suited for decorative backlighting in furniture and interior decorations..

LED STRIP WIDTH:

up to 12 mm

COLOR VARIATIONS:

- nonanodized.
- anodized silver.
- anodized black.
- anodized inox.
- lacquered white (RAL9016)

COVERS (diffusers):

- BASIC
 - * transparent (PMMA/PC).
 - * frozen (PMMA/PC).
 - * milky (PMMA/PC).
 - * frosted (PMMA).
 - * milky frosted (PMMA).
 - * lens 15 (PMMA).
 - * lens 30 (PMMA).
 - * black (PMMA)

Mounted from the top, snap-on.
